

# CAP 2030

*Activity and information about how to get trained to use the tool “Cap 2030” created by Associations 21 Belgium.*

## INFORMATION

### USEFUL FOR

- Managers and volunteer trainers, organisations working with volunteers
- Volunteers and operators in the organisations

### TYPE OF TOOL

Campaign

### MAIN FIELDS OF ACTION

Action on Economic Choices  
Circular Economy  
Social Economy  
Sustainability  
Taking Action

### RELATED SDG

All 17 SDGs are relevant for this activity

## DESCRIPTION

Transforming our world with the Sustainable Development Goals.

Cap 2030 is a management tool that enables companies to evaluate or design their actions and projects, or individual actions and projects, according to the 17 Sustainable Development Goals of the UN's Agenda 2030.

CAP 2030 is a fun way for a wide range of people to get to grips with the SDGs, based on their own realities and concerns. It can be used at all levels (in universities, local authorities, cultural centres, associations, schools, literacy centres, etc.). The groups that use this tool acquire, at their own level, a systemic vision inherent to Sustainable Development and think concretely about the actions that are or will be carried out.

Associations 21 (located in Belgium) organises training courses on how to use the CAP 2030 tool.
